

CREW COLLECTION

CREW COLLECTION

A line of highly technical, rugged performance products for on and off shore racing, training and sailing. This is the North Sails Crew Collection. Its proven cuts, tailored fits and fabric materials, constructed with the serious sailor in mind, are designed to outfit your crew in innovation and make the difference.

All the garments can be customized to bear a team name: there is nothing quite like the feeling of wearing your team colors when the logos and branding are embroidered on top quality gear with the very best name in the sailing world – North Sails.

SAILING

The North Sails Crew Collection includes an important line of highly technical and professional gear for sailing. It is designed with zero compromise to withstand the challenges of wind and water, for both training sessions and races.

Every single fit, tough, comfortable and fine-tuned, lives up to the standards of North Sails name and lays the foundations for victory.

FABRICS AND FEATURES

Top performance garments require top fabrics. This is why North Sails has carefully selected the best materials for your crew: ultra-technical, practical and long-lasting, they are all designed to meet the very highest standards in terms of quality and innovation.

CREW COLLECTION SPECIAL FEATURES

UV PROTECTION

Protection factor (UPF).

DWR

(Durable Water Repellent), is a coating added to fabrics to make them water-resistant.

ANTIBACTERIAL

Garments are treated with antibacterial and odor-control technology.

NORLAM 3L

NORLAM 3L

This is our most waterproof and breathable outerwear construction. The construction starts with a 3 layer fabric consisting of a durable woven face fabric that is laminated to a waterproof breathable membrane which is backed by a comfortable, lightweight tricot on the interior. NORLAM 3L garments have fully taped seams, water resistant zippers, storm flaps and protective closures which add strength to the garment and prevent water from penetrating.

TACTEL

Tactel

Special fiber, ultra-soft, lightweight and breathable.

- Quick-dry and non iron
- Breathable and light
- Abrasion resistant

TEFLON TREATMENT

An invisible treatment that creates a shield and protects the garment without impacting its weight, look, softness, colour or breathability. The fibers become completely waterproof, and stain resistant.

TECHNICAL OXFORD NORTH SAILS

Synthetic fiber with high levels of resistance to abrasion and traction, but also breathable and lightweight. If wet, it dries quickly.

KEVLAR

DuPont™ KEVLAR

Synthetic fiber, particularly strong and extremely resistant to heat and abrasion, even when wet. Versatile and long-lasting.
